he two dotted eighth note rests marked (!), but taken from the original (although they are not followed by shortened eighth notes), are an indication right at the beginning that the whole movement should always be played in dotted or overpunctuated form in the manner of the French overture. Accordingly, the three semiquavers leading to the next one from bar 4 onwards would also have to be shortened (and thus somewhat later than indicated) which the MP3 tries to reproduce. In any case, the "full organ" requirement permits a quieter registration for the short intermediate Adagio. - Small notated notes supplement the "harmonic underpinning" of the voice leading, which is not correct to the fugue, but which occurs repeatedly in the original. However, they also give brief suggestions for execution in places for ornamental improvisations that were common at the time. [JT]
